Somebody's Mother. The woman was old and ragged and gray. And bent with the chill of the winter's day The street was wet with a recent snow, And the woman's feet were aged and slow, She stood at the crossing and waited long. Alone, uncared for, amid the throng Of human beings who passed her by, Nor beeded the glance of her anxious Down the street, with laughter and shout, Glad in the freedom of "school let out," Came the boys like a flock of sheep, Hailing the snow piled white and deep Past the woman so old and gray Hastened the children on their way. Nor offered a helping hand to her. So meek, so timid, afraid to stir Lest the carriage wheels or the horses' feet Should crowd her down in the slippery street Should crowd her down in the slippery of At last came one of the merry troop— The gayest laddle of all the group: He pansed beside her, and whispered low "I'll belp you cross it you wish to go." Her aged hand on his strone young arm She pisced, and so, without hurt or harm. He guided the trembling feet along, Proud that his own were firm and strong Then back again to his friends he went, His young heart happy and well content "She's semebody's mother, boys, you know, For all she's aged and poor and slow; And I hope some fellow will lend a hand To help my mother, you understand, If ever she's poor and old and gray, When her own dear boy is far away.

A laugh rose and grow as nead stere near in her home that sight, and the prayer sho said was "God be kited to the n-bile boy. Who is somebody's son and pride and joy!"

NATURE'S REMEDY. **VEGETINE** THE GREAT BLOOD PURIFIER

GENERAL DEBI ITY. In this complaint the goo fects of the VEGETINE are realized immediatel varcus of the VEGETINE are realized immediately after commencing to take it; as debility denotes deficiency of the blood, and VEGETINE acts directly upon the blood. There is no remedy that will restore health from debility like VEGETINE. It is nourishing and a renathening, purifies the blood, regulates the bowels, quiets the nervous system, acts directly upon the secretions, and arouses the whole system to action. It has never failed in this complaint.
